

SPECIFICATIONS

▪ Length overall (m)	6,33	▪ Water capacity - optional (l)	45
▪ Beam maximum (m)	2,39	▪ CE design category	C
▪ Deadrise (deg)	20	▪ Maximum number of people	7
▪ Height - without canvas (m)	2,07	▪ Maximum power (hp)	200
▪ Dry weight (kg)	1103	▪ Maximum power (kw)	147
▪ Fuel capacity (l)	160	▪ OB shaft length	XL

STANDARD EQUIPMENT

- Laminated teak
- Seat cushions (back and bow)
- Anti-fouling painting
- Engine secure mark
- Mooring package
- Fenders
- Console and seat covers
- Integrated swim ladder
- Navigation lights
- Radio (USB – MP3)
- GPS & Chart Plotter
- Electro hydraulic steering
- SmartCraft Instrumentation
- Electric bilge pump
- 12 volts socket
- Compass
- Fire extinguisher
- Integrated deck water drain

OPTIONAL EQUIPMENT

- Special Edition:
 - Orange hull color
 - 7" GPS & chart plotter screen
 - LED lighting
 - Sporty steering wheel
 - Dark beige seating color
- Bow table
- Bow sundeck
- Chemical toilet
- Sea toilet
- Enclosed canvas
- Ski mast
- Real teak
- Cool box

MERCURY ENGINE OFFERING

F 150 EXLPT EFI

OptiMax Engines

115 XL OptiMax
125 XL OptiMax
150 XL OptiMax Pro XS

Verado Engines

150 XL Verado
175 XL Verado
200 XL Verado

UNIQUE STERN DESIGN

The back part of the boat has a unique design that offers:

- easy access to the water
- integrated enclosed canvas
- high freeboard for a maximum of safety feeling on board

The integrated canvas is stored underneath the top step. It's perfectly flat and provides a safe and easy access from the stern to the cockpit area.

FEATURES & BENEFITS

BOW SECTION VERSATILITY

The large open bow section can easily be converted into a dining area that comfortably seats 7 persons around the table.

Due to clever Using design it will take just a moment to transform the bow section into a big comfortable sundeck area which is certainly the largest one in its category.

COCKPIT PROTECTION

A great canvas design for a maximum of comfort in all weather conditions:

- The stainless steel canvas mechanism has a dedicated storage space between the freeboard and the cockpit and does not compromise the passengers comfort on the back seat
- The canvas storage is located below the top step of the stern and provides an easy and quick deployment when rain is coming.

Once deployed, the cockpit becomes an enclosed area that is totally protected against the rain. On each side of the console, a water drain is integrated into the deck which will keep the cockpit area absolutely dry even with intense rain.

CONSOLE : GREAT ACCESS WITH OPTIONAL INTEGRATED SEA TOILET

The S62 console offers large storage space. The storage area is accessed via a large hatch that is integrated in the front part of the console. You will notice that the front side access we created makes it much more convenient to use this large storage space. When opened, the hatch will remain in an opened position thanks to two strong gas struts on each side. This is not only convenient but offers additional protection for the person who uses the storage.

A unique feature for this 6 meters center console boat is the optional integrated flush toilet that perfectly fits into the console.

STORAGE SPACE

On the S62 we put a lot of thought in creating optimal storage space. The anchor and the mooring material perfectly fit in the back side (number 1 and 2 in the image right) whereas the fenders will have a dedicated place under the hatches (number 3 and 4 in the right image). The top step cover (area with Uttern in right image) hides the enclosed canvas storage. Behind the back seat (number 6), you will find ample storage area for bags, cushions or other accessories such as skis, jackets and bags. The console (number 7) contains a huge storage space which easy front side access. Underneath the bow seating (number 8 and 9) there is additional storage for those things you want to keep near when dining or sunbathing. In the front bow storage (number 10) there is space for an eventual additional anchor.
